Professional Summary

AI/ML focused Computer Science student at IIMS College, Kathmandu (Taylor's University affiliate), with a strong foundation in structured problem-solving and teamwork. I have practical experience in data-driven projects including data analytics, machine learning, EDA, data visualization, streamlit, dashboard development, and KPI tracking using Python, SQL, Power BI, Tableau, and Excel. Alongside this, I have worked on web development using JavaScript, React, HTML, CSS, and PHP, and I am currently building my skills in C# and ASP.NET for .NET development. I am passionate about technology and eager to apply my skills to develop scalable, real-world applications.

Education

Institute of International Management Science (IIMS)

Jan 2023 – Jan 2027

Bachelor of Computer Science – Specialization in Artificial Intelligence (Ongoing)

Kathmandu, Nepal

Affiliated with Taylor's University of Malaysia

GoldenGate International Secondary School

2019 – 2021

Higher Secondary Education (+2)

Kathmandu, Nepal

Technical Skills

- **Data & Analytics:** SQL, Python (Pandas, NumPy), OpenCV, YOLOv8, MediaPipe, MySQL, Power BI, Tableau, Excel, Data Cleaning, EDA, ETL Processes, Data Modeling, Statistical Analysis, KPI Development
- **Web & Software Development:** JavaScript, React.js, HTML5, CSS3, PHP, Swift, SwiftUI, C#, ASP.NET Core, OOP, REST APIs, Web APIs, MVC Pattern, WordPress, Responsive Design
- **Mobile & AR:** ARKit, LiDAR, RealityKit, CoreML, iOS App Development, UI/UX Prototyping, Testing
- **Growth & Marketing Analytics:** Google Analytics, Campaign Performance Analysis, Conversion Tracking, SEO Data Analysis, Reporting & Dashboarding
- **AI & Automation:** Scikit-learn, AI Tools & Workflow Automation, AI-assisted Tagging, Prompt Engineering
- **Platforms & Tools:** Git, GitHub, Postman, Jupyter Notebook, Google Colab, VS Code, Microsoft Office, ThingsBoard, MQTT

Projects

Agrifood CO2 Emissions: Global Trends, Sources & Climate Linkages (1990–2020)

2026

Python, Pandas, Matplotlib, Seaborn, Streamlit

- Examined global agrifood CO2 emission data spanning 30 years using Python scripting
- Discovered key emission sources and climate linkages through statistical analysis and data visualization
- Built an interactive multi-page Streamlit dashboard with filterable charts, trend lines, and regional comparisons
- Automated data cleaning and transformation pipeline to handle missing values and inconsistencies in the dataset

Padel Game Analytics: Shot Classification System

2026

Python, OpenCV, YOLOv8, MediaPipe, NumPy, Matplotlib

- Built a CV pipeline to detect and track ball, racket & players with persistent IDs using IoU-based multi-object tracker
- Classified 5 shot types (Forehand, Backhand, Smash, Serve, Volley) using a two-tier system combining racket geometry and ball trajectory analysis
- Exported structured JSON/CSV results and generated annotated output video with live overlays and analytics dashboard

Capstone Project – 3D Reconstruction iOS App using LiDAR Sensor 2025

Swift, SwiftUI, ARKit, LiDAR, RealityKit, CoreML,

- Created and developed an iOS application leveraging the LiDAR sensor for real-time 3D reconstruction of physical environments
- Implemented depth data processing pipeline using ARKit and Swift, enabling accurate point cloud generation
- Optimized rendering performance for smooth real-time visualization on iPhone Pro devices
- Built intuitive UI for users to capture, view, and export 3D models

Data-Driven Sales Performance & Inventory Optimization – Fashion Gallery 2026

Tableau, SQL, Excel

- Processed and investigated retail sales and inventory data to recognized performance gaps and optimization opportunities
- Built an interactive Tableau dashboard tracking 8+ KPIs including revenue, sell-through rate, and stock turnover
- Identified slow-moving inventory segments, leading to a 12% potential reduction in overstock costs
- Generated drill-down views enabling store managers to monitor category-level and SKU-level performance

BrightEduNepal – eLearning Platform Web Application 2025

PHP, JavaScript, HTML5, CSS3

- Enhanced a full-featured eLearning web platform improved to support startup ideation for educational businesses in Nepal
- Engineered responsive multi-page UI with course listings, enrollment flows, and instructor dashboards
- Integrated user behavior tracking to improve content engagement and conversion flow
- Reduced page load time by 25% through component optimization and lazy loading implementation

Certifications

Certificate of Course Completion – Introduction to ASP.Net <i>Simpilearn</i>	7 th May 20
Certificate of Achievement – MERN Stack (70 Hours Professional Training) <i>Broadway Infosys & IIMS College</i>	Dec 2024 – Feb 2025
Certificate of Course Completion – Machine Learning <i>Simpilearn</i>	20 th Feb 2025
Enterprise Design Thinking Practitioner <i>IBM</i>	Mar 2024
Certificate of Course Completion – Nautural Language Processing <i>Geart Learning Academy</i>	Jun 2024
Certificate of Course Completion – Network Support and Security <i>Cisco Networking Academy</i>	Jun 2023
Certificate of Participation – Future Forward: Communication Skills (6-Hour Workshop) <i>IIMS College</i>	July 2023
