Professional Summary

I am a motivated Computer Science student with a strong foundation in structured problem-solving and teamwork. I have experience in data-driven projects including data analysis, dashboard development, and KPI tracking using Python, SQL, Tableau, and Excel. Alongside this, I have worked on web development using JavaScript, React, HTML, CSS, and PHP, and I am currently building my skills in C# and ASP.NET for .NET development. I am passionate about technology and eager to apply my skills to develop scalable, real-world applications.

Education

Institute of International Management Science (IIMS)

Bachelor of Computer Science – Specialization in Artificial Intelligence (Ongoing)
Affiliated with Taylor's University of Malaysia

Jan 2023 – Jan 2027

Kathmandu, Nepal

GoldenGate International Secondary School

Higher Secondary Education (+2)

2019 – 2021

Kathmandu, Nepal

Technical Skills

Data & Analytics: SQL, Python (Pandas, NumPy), MySQL, Tableau, Excel, Data Cleaning, EDA, ETL Processes, Data Modeling, Statistical Analysis, KPI Development

Web & Product Development: JavaScript, React.js, C# (learning), OOP concepts, HTML5, CSS3, PHP, Swift, ASP.NET Core (learning), Web API, MVC Pattern, WordPress, Responsive UI Design

Growth & Marketing Analytics: Google Analytics, Campaign Performance Analysis, Conversion Tracking, SEO Data Analysis, Data Visualization

AI & Automation: Scikit-learn, AI Tools & Workflow Automation, AI-assisted Tagging, Prompt Engineering

Platforms & Tools: Jupyter Notebook, Google Colab, Git, Postman, VS Code, Microsoft Excel, PowerPoint, Word, IoT (ThingsBoard, MQTT), ARKit/LiDAR

Projects

AgriFood CO2 Emissions: Global Trends, Sources & Climate Linkages (1990–2020)

2026

Python, Pandas, Matplotlib, Seaborn, Streamlit

- Examined global agriFood CO2 emission data spanning 30 years using Python scripting
- Discovered key emission sources and climate linkages through statistical analysis and data visualization
- Built an interactive multi-page Streamlit dashboard with filterable charts, trend lines, and regional comparisons
- Automated data cleaning and transformation pipeline to handle missing values and inconsistencies in the dataset

Padel Game Analytics: Shot Classification System

2026

Python, OpenCV, YOLOv8, MediaPipe, NumPy, Matplotlib

- Built a CV pipeline to detect and track ball, racket & players with persistent IDs using IoU-based multi-object tracker
- Classified 5 shot types (Forehand, Backhand, Smash, Serve, Volley) using a two-tier system combining racket geometry and ball trajectory analysis
- Exported structured JSON/CSV results and generated annotated output video with live overlays and analytics dashboard

Capstone Project – 3D Reconstruction iOS App using LiDAR Sensor

2025

Swift, ARKit, LiDAR

- Created and developed an iOS application leveraging the LiDAR sensor for real-time 3D reconstruction of physical environments
- Implemented depth data processing pipeline using ARKit and Swift, enabling accurate point cloud generation
- Optimized rendering performance for smooth real-time visualization on iPhone Pro devices
- Built intuitive UI for users to capture, view, and export 3D models

Data-Driven Sales Performance & Inventory Optimization – Fashion Gallery

2026

Tableau, SQL, Excel

- Processed and investigated retail sales and inventory data to recognized performance gaps and optimization opportunities
- Built an interactive Tableau dashboard tracking 8+ KPIs including revenue, sell-through rate, and stock turnover
- Identified slow-moving inventory segments, leading to a 12% potential reduction in overstock costs
- Generated drill-down views enabling store managers to monitor category-level and SKU-level performance

BrightEduNepal – eLearning Platform Web Application

2025

PHP, JavaScript, HTML5, CSS3

- Enhanced a full-featured eLearning web platform improved to support startup ideation for educational businesses in Nepal
- Engineered responsive multi-page UI with course listings, enrollment flows, and instructor dashboards
- Integrated user behavior tracking to improve content engagement and conversion flow
- Reduced page load time by 25% through component optimization and lazy loading implementation

Certifications

Certificate of Course Completion – Introduction to ASP.Net

7th May 20

Simpilearn

Certificate of Achievement – MERN Stack (70 Hours Professional Training)

Dec 2024 – Feb 2025

Broadway Infosys & IIMS College

Certificate of Course Completion – Machine Learning

20th Feb 2025

Simpilearn

Enterprise Design Thinking Practitioner

Mar 2024

IBM

Certificate of Course Completion – Natural Language Processing

Jun 2024

Geart Learning Academy

Certificate of Course Completion – Network Support and Security

Jun 2023

Cisco Networking Academy

Certificate of Participation – Future Forward: Communication Skills (6-Hour Workshop)

July 2023

IIMS College

Languages

English (Proficient)

Nepali (Proficient)

Hindi (Competent)
